Internships Make a Difference

If you are recruiting for **2025 internships** and **entry level roles**, we have skilled, hard-working, and vetted STEM talent ready to contribute, learn, and make a difference in your organization. Please contact Jasmyn at jasmyn@stemadvantage.org to discuss your hiring needs.

Scholars @ SHPE Convention

Thanks to your support, we funded 50 Scholars to attend the 2024 SHPE (Society of Hispanic Professional Engineers) Convention in Anaheim. Our Career Programs team - Jasmyn and Beatriz - did an outstanding job preparing students to have a plan and take full advantage of the convention, which featured four days of speakers, competitions, networking, and a career fair. A great success as many students were selected for interviews with leading companies and received internship and full-time job offers. Sharing a few photos...

Alumna Featured @ Women in Technology Hollywood Summit

We are incredibly proud of STEM Advantage alumna Han Pham, who is a Software Engineer at The Walt Disney Company and represented us on a panel at Women in Technology: Hollywood's (WiTH) Women's Summit. April Schneider, WiTH Foundation Board Member and Vice President IT at Sony Pictures Entertainment, hosted a heartfelt panel "Empowering the WiTH Community" of young

women representing nonprofit organizations that have benefited from WITH's support.

Han shared "STEM Advantage is changing the lives of students. I was at the WITH event last year. People giving their time, mentorship, and email - like Dr. Lynda Murray-Thomas from NBCUniversal - can change your life, and it certainly changed mine." Thank you to WITH for your continued partnership and passion for empowering women in tech.

Cal State LA Mixer

Thank you, Cal State LA for hosting a mixer for our Cal State LA Scholars and STEM Advantage team to catch-up before finals. It's always nice to see and talk with our Scholars in person. Since many attended the SHPE convention and other conferences, there was a lot to discuss. Everyone appreciated the pizza as well.

It was nice connecting with T. Fox, who represents the California State University (CSU) system on our Board of Directors, and our partners from the College of Engineering, Computer Science and Technology - Daniel Galvan, Cambrian Sorel, Dean Nancy Warter-Perez, and Associate Dean Mark Tufenkjian. We are grateful for your wonderful partnership.

Invest in STEM Talent

Talent is equally distributed, but opportunity is not. STEM Advantage mentors, prepares, and inspires women and underserved communities, primarily first-generation college students from low-income families, for STEM careers empowering economic and social mobility, while providing a vetted pipeline of diverse talent to businesses to fill their workforce needs.

Thank YOU for making an investment that is changing lives!
